28 October 2025

Biography Aaron PAYNE

Aaron is an official at the UK Department for Science, Innovation and Technology (DSIT), and since 2022 has been responsible for international policy for engineering [synthetic] biology. At DSIT's predecessor department, BEIS, he worked on research security. His prior experience was in media and strategic communications, first at the Daily Mail and then at the Cabinet Office where his final project was to lead a review assessing the government's use of communications as a soft power lever. He retains a general interest in the way communications can help or hinder government policy. He has a Master's in Newspaper Journalism from City University, London, and a BA in History & Politics from the University of Oxford.
