Biography Dr. Øyvind Albert VOIE

Øyvind Voie is an experienced researcher and research manager with over 30 years in the research and innovation sector. He has a demonstrated history of leadership in Research and Development (R&D), Biology, Toxicology, Biotechnology, Human Performance, Chemistry, and Environmental Science.

Voie holds a Ph.D. in Toxicology from the University of Oslo and currently leads a research group on Soldier Performance at the Norwegian Defence Research Establishment (FFI). He is also an active member of

the NATO Science and Technology Organization’s Human Factors and Medicine (HFM) Panel.

In addition to his scientific work, Voie is the author of the Brotherhood of the Snake series — a science-fantasy saga for young adults.
